Electronica - downtempo, influences: Bonobo/Portishead

## THE PROJÉT

Was born when D.Bunty (Singer/Writer/Composer) and anzyM (Guitarist/Composer) former members of the Rock/Funk band Gaman ([www.myspace.com/gamanspace](http://www.myspace.com/gamanspace)) decided to work together again. They both are electronic music fans and have always mixed different music styles in their projects.

## THE ARTISTS

**D.Bunty** is a dynamic and a touche-à-tout artist, over the past ten years he has been working on different music projects of various styles such as rock, metal, funk, soul, blues... among them two albums came out: *L&A*, an electronic and acoustic auto-production in which featured David LeDeunff (Hocus Pocus), *Tabula Rasa* a progressive-auto-production composed by Eric Lorcey for the band The Daedalus Spirit Orchestra ([www.myspace.com/dsorchestra](http://www.myspace.com/dsorchestra)) in which he is the singer and writer. The band also covered a song for the compilation *Keep off the grass* of the UK label FruitsdemerRecords ([www.fruitsdemerrecords.com](http://www.fruitsdemerrecords.com)).

Involved into music by rock, funk and metal, **anzyM** learned his first riffs on an electric guitar. After playing in a few bands and being attracted as much by composition as playing with sound effects, he started using samplers and other electronic devices to write tracks. As he wanted to find the sensation of playing an instrument again but with electronic devices, he's now playing with sounds on a monome.

## THE "E/C" EP

Is a creation that mingles greatly music instruments (drums, percussions, counter bass, guitars and keys...) with electronic devices (monome, rhythm box, sound FX) in a relaxing and catchy ambiance. The human dimension brought by the instruments is enforced by the smart choice of the female voices with sensitiveness and delicateness (Nina Desprès, Miriam Hübl, Francesca Galea...).
